Projects

Reflex

A system for creating scripted scenes within the Unreal Engine

📅 11/2020 – 01/2021   💼 Blink Studios

- Reflex allows writers to create scripted scenes extremely quickly, massively speeding up development.

Fluxlab

A VR circuit building game built in the Unreal Engine

📅 01/2021 – 05/2021   💼 Texas Tech University

- Fluxlab is a VR circuit building game built in the Unreal Engine. The game allows players to build complex circuits along a grid using 4 different block types.

Organizations

Swordsman

Dallas School of Historical Fencing

📅 06/2021 – Present   📍 Dallas, Texas

- Learned the techniques surrounding German longsword, saber, sword and shield, sword and buckler, and many more weapons from manuscripts written from the 11th to 15th century.
- Utilized accurate steel weaponry with modern fencing gear.
- Practiced three times a week, as well as participated in tournaments.
- Strengthened many introspective skills such as courage, self-trust, and confidence.

Improviser

Sentient Nuts

📅 10/2019 – 05/2021   📍 Lubbock, Texas

- Learned about and performed in improv shows multiple times a month.
- Attended practice every Sunday.
- Developed a "yes, and" attitude towards new ideas.

Guildmaster & President

The Computing Guild

📅 04/2020 – 05/2021   📍 Lubbock, Texas

- Built the organization from scratch.
- Facilitated an unprecedented partnership with Texas Tech administration.

Awards

2019 Excellence in IT Innovation Award

Texas Tech University

📅 12/2019

- Provided student data to the colleges and departments in a more concise way without requiring access to a complex tool.
